***Cybershape Wood CWT***

**Code: 32203**

**MRP : 17800.00**

The future is here! Cybershape Wood CWT is the second table tennis blade in the Cybershape family with the revolutionary shape that took Truls Möregårdh to the 2021 World Cup final. Cybershape Wood CWT is a factory-lacquered, offensive blade that is made up of five exclusive wooden layers and developed to work optimally with a wide range of STIGA's table tennis rubbers. This makes Cybershape Wood a blade that suits the majority of playing styles. Apart from its revolutionary shape, Cybershape Wood CWT is the world's first table tennis blade with the groundbreaking technology, STIGA CWT (Custom Weight Technology). STIGA CWT is STIGA Sports' latest innovation that allows you to adjust the weight and balance of the blade using three magnetic weights of 3, 6, and 9 grams that you can easily attach to the bottom of the handle. The symbiosis of exclusive materials, the unique Cybershape design, and the customizable CWT weights result in a flexible blade that fits several different play styles. In addition to the unique Cybershape design delivering a larger sweet spot and optimized hitting area, the shape also provides clear advantages when it comes to game development and improving technical skills. The six edges of the blade make it easier to see and find the correct angle using different strokes.
