PRODUCT SPECIFICATIONS

Cybershape Carbon CWT

Code: 32204

MRP : 35000.00

Cybershape – a completely new type of blade with a unique shape and larger hitting area! Cybershape is a 5+2-ply blade based on CCF (Close Core Fibre) technology, which means that the carbon layer sits directly on top of the wood core. The result is more control and speed in your game. Cybershape's unique shape also makes it easier for the player to see the hitting area when serving. Cybershape has a larger sweet spot that lies further out on the blade when compared with a regular-shaped blade. The frequency response is also more linear, which means that the vibrations are transported differently to the handle and hand. For the player, this means a completely new and unique feel during play compared with a traditional blade.
