PRODUCT SPECIFICATIONS

Cybershape Wood

Code: 32201

MRP : 14000.00

The revolutionary shape that took Truls Möregårdh to the 2021 World Cup final. Cybershape Wood is a factory-lacquered, offensive blade that is made up of five exclusive wooden layers and developed to work optimally with a wide range of STIGA's table tennis rubbers. An offensive table tennis blade with a revolutionary, patent pending and design-protected shape that provides an optimised hitting area. The symbiosis of exclusive materials, the unique Cybershape design, result in a flexible blade that fits several different play styles. Developed together with STIGA professional players to work optimally with a wide range of STIGA's table tennis rubbers. According to measurements from tests carried out in collaboration with KTH, Cybershape has a larger sweet spot placed higher up on the blade than a standard shape which gives more power in your strokes without losing control of the ball. Handles are made of the top-quality Italian wood and have a surface roughness that ensures an optimal gripping surface without the handle feeling slippery.
