PRODUCT SPECIFICATIONS

DNA Platinum S

Code: 32292

MRP : 8400.00

Advanced table tennis rubber with superior grip and spin that allow for strikes from challenging angles. A thinner top sheet can accommodate a thicker sponge, thus offering more speed and power. It features shorter pimples for greater surface contact between sponge and blade. Power Sponge Cells for increased catapult effect and optimal power. A unique rubber compound with long durability and a clear, crisp sound. A sponge hardness of 42.5 degrees gives you increased feeling and ball control.
