PRODUCT SPECIFICATIONS

Cybershape Wavy Ultra Fibre

Code: 32369

MRP : 9500.00

Wavy Ultra Fibre Cybershape is one of our fastest-ever blades and is designed for players who want to take control of the game with explosive attacks and maximal speed. A powerful blade combining ultra fibre – a completely new material in our assortment – with a classic wood appearance. The strong, white ultra fibre is nestled just below the surface layer to create a perfect balance between power and control. This material also reduces unwanted vibration and provides a sharp, direct ball impact so you can play with maximal precision. The responsive design and impressive speed make Wavy Cybershape ideal for offensive players looking to take control over the game with rapid attacks and aggressive shots. The clear sound of each ball impact provides an added dimension to your playing experience. Thanks to the unique Cybershape design, you get a larger optimized impact surface in the upper half of the blade compared to traditional blades. The increased sweet spot, located higher up on the blade, offers optimal impact and stability. Wavy is also available in the classic round shape so you can adapt your game to your personal style. Combine it with DNA Hybrid, DNA Platinum, or DNA Dragon Power for a bat that takes your offensive game to the next level.
