PRODUCT SPECIFICATIONS

Arc 2

Code: 32312

MRP : 16000.00

ARC 2 is a follow-up to our popular padel racket ARC. Just like its predecessor, ARC 2 is a padel racket with a round shape and low balance, and composed of Hypersoft Foam – an EVA core with a particular density for maximum playability. ARC 2 boasts an updated neck design and a rough surface. Carbon Fusion, the thin surface layer of carbon fibre, combined with several layers of fibreglass makes the ARC 2 padel racket very durable while providing good speed, comfort and control. The rough Power Grip surface also allows for a better grip on the ball for more spin and effect in the game. The racket's extended grip makes it perfect for the two-handed backhand. Combined with a generous hitting area and a low balance, the racket makes for a powerful weapon on the court. A perfect all-round racket for both new and experienced players.

Length：	455mm
Construction：	12K carbon
Style ：	Attack
Net Weight：	365±10gms
Surface：	Rough
Balance：	Low
Level：	Professional
Shape：	Round
