PRODUCT SPECIFICATIONS DNA Platinum M

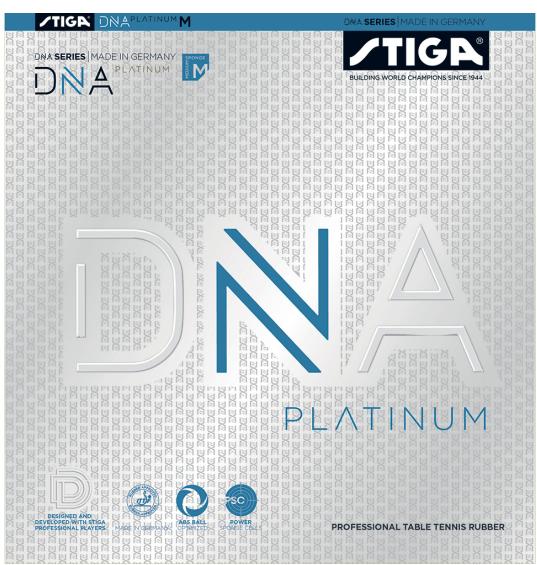

DNA Platinum M

Cr. 1. 22202

Code: 32293

Advanced table tennis rubber with superior grip and spin that allow for strikes from challenging angles. A thinner top sheet can accommodate a thicker sponge, thus offering more speed and power. It features shorter pimples for greater surface contact between sponge and blade. Power Sponge Cells for increased catapult effect and optimal power. A unique rubber compound with long durability and a clear, crisp sound. A sponge hardness of 47.5 degrees offers the perfect balance between control and speed.

Approved By: ITTF Approved

Control: 76

Speed: 160

Spin: 140

Sponge : 47.5°
