PRODUCT SPECIFICATIONS

A6.0FD Elliptical-Bluetooth

Code: RVAR-10612SLBT

MRP : 93000.00

Front driven, the A6.0's 9 kg flywheel sits below the console to create a stable foundation. Compared to most rear-drive trainers, the longer stride length (108 cm) helps shallow and extend your movement for a more natural gait. With 32 levels of resistance and 12 pre-set workouts, the A6.0 creates challenging home workouts. Featuring an LCD display and hand pulse sensors, the Astroride console helps tailor your workouts with live performance stats for effective sessions. Compatible with the Reebok Fitness App, you're able to tailor and track your workouts whilst virtually running real-life routes.

DESCRIPTION
