Backing: Nylon Winding, Construction: Moulded
FIFA TEST CRITERIA

Permanent Roundness (Sphericity)
The difference between the average radius and each individual radius is measured and must not exceed a certain percentage.

Minimal water absorption (Outdoor and beach soccer balls only)
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Balance: Minimal Change of Direction (futsal only)
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Consistent Circumference
Footballs are inflated to a defined pressure and then the ball’s radius is measured at defined points.

Uniform rebound
Footballs are dropped ten times onto a plate from a height to two meters and must rebound consistently.

Perfect Weight
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Shape and size retention
The test ensures the ball’s shape, pressure, and circumference remain constant for the duration of a match and only applies for the top quality FIFA APPROVED balls. The ball is fired 2,000 times against a steel plate at 50 kilometres per hour. The seams and air valves must remain undamaged and only minimal loss of pressure and changes in roundness and circumference are permitted.
PU BALLS

FIFA Approved

PLATINA
Code: 14023

More Information:
FIFA International Match Standard Ball.
Made with Imported PU/Rubber materials which is Durable and Long Lasting. Strong Backing Materials is used for Shape Retention.

TECHNICAL SPECIFICATION OF TABLES

COMPACT STORAGE SYSTEM
Table tennis has always occupied many people within a limited space. Training and competitions often require many tables to be available at the same time. CSS tables make it easier to store large numbers in a small space.
- The table halves are stored folded into each other, thus reducing drastically the space required.
- The height of the table is only 155 cm.
- Each table leaf has its own wheeled base, which means the table is easier to handle.

COMPACT SYSTEM
The new folding system minimizes the risk of injuries during table storage due to its unique compact design.

NET INCLUDED
Some of our tables come with suitable net.

SAFETY BAR
The Safety Bar will prevent that a child can stay between the table tops.

PATENT SYSTEM FOR UNLOCKING
By pulling the metal handle, which is connected to a wire, the safety devices will be released and the table can be placed into playing position.

ONLY FOR INDOOR USE
This table should only be used for indoor playing.

**CARBONADO 145**  
*Code: 32145*

Constructed with Carbon layers in a 45 degree angle. It is a perfect choice for the offensive player who looks for good speed and stability combined with excellent control. Wide personalized sweet spot.  
Grip: Legend/Master/Winner

---

**CARBONADO 190**  
*Code: 32146*

Constructed with Carbon layers in a 90 degree angle. Excellent choice for players who want to command the gameplay with high speed strokes. High personalized sweet spot.  
Grip: Legend/Master/Winner

---

**THE WRB SYSTEM** accelerates the blade face for faster returns, more power and extra sensitivity of touch.  

**THE CR SYSTEM** (Combi Revolution) is when front part of the blade is UV finished, which yields a reasonably increased speed to the ball. A CR system blade is at least 21% faster than a conventional one.  

**THE ACS-TECHNOLOGY** allows very high speed to be combined with max springiness/elasticity in an ultra-light rubber with outstanding control.  

**THE STIGA TUBE** is a technology where the middle veneer with "micro-channels" lengthways in the middle ply of the blades. The channels are then filled with different materials depending on the blade’s desired characteristics.  

**MAX** has a thick sponge and thinner surface rubber.  

**THE CRYSTAL TECHNOLOGY** increases your speed. Normal blade treatments use regular lacquer, but Crystal Technology employs a transparent hydrophilic gel lacquer that STIGA specially developed.  

**THE STIGA TITANIUM** rackets is built for speed! Our researchers were amazed by the results of the blend of extremely light Titanium with our handpicked choice woods. This combination is clearly a 21st century weapon. This blade is ideal for smashing and attacking the ball at all stages of the rally.  

**VENEER PRECISION SYSTEM (VPS)** Treats the veneers with a unique and exact heating and cooling process. It gives the outer surface extra hardness and an incredibly smooth finish.  

**THE DIAMOND TOUCH TECHNOLOGY** gives the outer veneers extra hardness and the surface an incredibly smooth finish.
J.M.S. EV01

**Code:** 32132

JMS EVO 1 is an exceptional allround rubber. It guarantees easy in learning all offensive strokes. It is suited for powerful attacking style of play with control. Thickness: 2.0mm Max

- **BUILT-IN SPEED GLUE EFFECT**: To achieve maximum power
- **TRANSTENSION SPONGE**: Thanks to the TransTension Sponge and the exciting material, we have found a formula that will revolutionize and generate maximum tension and sponge power.
- **THE NCT TECH**: Rubber use our nano technology, and are designed for the era that begins with the ITTF speed glue ban.
- **LONG TRAJECTORY**: We focused on creating a longer trajectory on the ball, as a long trajectory in today’s game is more and more important. The combination of spin, speed and long trajectory is unique on STIGA’s rubbers; you have never felt this level of play before.

- **OCS**: The brand new Oxygen Capsule System is our most advanced rubber technology, specially adapted to the new poly ball. The OCS-sponge generates a very high amount of catapult effect thanks to the precisely measured size of the air pockets. This technology is developed to generate the maximum amount of speed and spin possible.
- **APS**: The Advanced Pimple Structure with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.
- **TENSION RUBBER**: stands for a truly modern table tennis rubber characterized with a lots of feel, spin variations and intense dynamics.
- **POLY BALL**: Optimized Stiga Rubber
